# Genetic Code Of Homoeopathy

An e-journal based on the teachings of  
Dr. Prafull Vijayakar's Predictive Homoeopathy

# GENETIC CODE OF HOMOEOPATHY

An e- Journal based on the teachings of Dr. Prafull Vijayakar's  
Predictive Homoeopathy

## CONTENTS :

1. Editorial
2. The Lesser known facts about Dr. Prafull Vijayakar
3. About the magazine
4. Pledge of a true Homoeopath
5. Predictive Homoeopathy
6. Journey of Dr. Hahnemann
7. Organon section
  - a. Explanation of Aphorism 1
  - b. In depth case taking.
8. Materia Medica section
  - a. Study of the group Ophidia with a detailed drug picture of Lachesis.
9. Repertory section  
Thorough understanding of the rubric 'Abusive' with differentiation of the remedies.
10. Study of systems and organs with clinical correlation of their pathology with miasms, embryology, anatomy and pathophysiology of skin.
11. Clinical section  
Exclusive cases of Dr. Vijayakar for this issue
  - a. Case of acute appendicitis
  - b. Case of hamartoma
  - c. Case of retinal detachment

**Honorary Advisor**  
Dr. Prafull Vijayakar

**Editorial Board**  
Dr. Dipali Gupte  
Dr. Kavita Sawant  
Dr. Bhakti Poojara

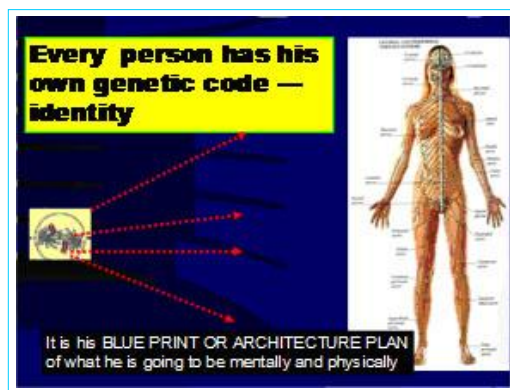

# About The Magazine

## GENETIC CODE OF HOMOEOPATHY

### What is genetic code?

Science has now proved that every living being has a genetic code. Genetic code is the blue print of whatever that particular living being is desired to be, to do, to feel. This is the very basic thing about existence.

In every living being including man the physical and mental design is all encoded in the genes which are present in all cells of the body.

Just as an architect needs a proper plan in front of him for building a house, similarly the body has a blueprint in the "Genes" of all the information about the particular living thing, its structure, size, shape, function. A civil engineer will not start erecting walls as the first step. This was not even done during age old times of Vastushastra.

Even today weight bearing, structural strength, columns & pillars, are all calculated according to the stress the building is going to take. The layout needs to be made as to where the bedroom, kitchen etc need to be. This scientific and mathematical approach leads to a long sustaining structure. Thus just as an architect needs a proper plan of dimension of every room, layout of bedroom, kitchen, pillars, loadbearing and so on properly designed and calculated, similarly each species has its own developmental plan—often described as a sort of "blue print" for building the organism.—which is encoded in the DNA molecules present in its cells. This developmental plan determines the characteristics that are inherited. Thus whether it is a bacteria, fish or human being, all of them have a plan laid out before hand which we call genetic code.

each species has its own developmental plan—often described as a sort of "blue print" for building the organism. — which is encoded in the DNA molecules present in its cells. This developmental plan determines the characteristics that are inherited. Thus whether it is a bacteria, fish or human being all of them have a plan laid out before hand which we call genetic code

In our journal, we are trying to emphasize that the science of homoeopathy also has certain blue prints laid down by Dr. Hahnemann which unfortunately are undergoing mutation because of certain homoeopaths who are making new additions and deletions and their own interpretations. This indeed is doing great harm to homoeopathy. It is our endeavor through the medium of this journal to go back to the concepts laid down by Dr. Hahnemann which were so futuristic. Every latest scientific invention confirms his beliefs and hypothesis. With this let us go 'back, .... to the future' in completely understanding this futuristic science. Truly Dr. Hahnemann can be called 'Nostradamus of medical science'.

### So what are genes ?

Genes are the functional unit of inheritance. They are the blueprints of the physical and mental make up of the man. Each gene is a nucleic acid sequence that carries information representing a particular protein. Proteins are the building blocks for everything in our body like bones and teeth, hair, earlobes, muscles and so on. These proteins help our body to grow, work properly, and stay healthy. Each and every aspect of the individual and his tendencies has their origin in the Genetic Code and this is exactly what gives rise to Individualization.

### The essence of Homoeopathy is also “Individualization”

Dr. Hahnemann has laid down before the world in great detail the method of how to practice this wonderful science and art of Homoeopathy. To this date not many homoeopaths have completely understood the ideas Dr. Hahnemann has put forth. The entire science that he has formulated is based on Genetics.

When Dr. Hahneman talked about individualization, some of his followers started understanding mind as the identity of the man, some thought disease as the identity of the man and some thought generals as the man's identity. His followers did not understand him in toto. They started misinterpreting him as per their whims and fancies. This caused homoeopathy to go into chaos and mockery. That is how homoeopathy became non standardized. Cures were sporadic. Nobody was able to show law of cure in cases treated.

Homoeopathy is the only science which is based on fundamental universal laws .This is the only science which follows the direction of cure. This is the Individuality of Homoeopathy. They are the blueprints of Homoeopathy .These laws are like the proteins that form strong pillars on which the solid structure of homoeopathy is built. These laws form the genetic code of Homoeopathy which means if you are not following or violating any of the principle, you are not practicing Homoeopathy correctly.

From here comes the name of the magazine “Genetic code of Homoeopathy”. The journal is based on this genetic code.

Every Homoeopath has to follow this code of conduct.

Then and only then can he cure the curable and incurable cases with ease.

Then and only then can he widen the scope of Homoeopathy.

Then and only then can he dare to tread untrodden path of curing cases like blind, deaf, dumb, autism etc.

He who is a true Hahnemannian Homoeopath should necessarily have the following traits :

Genes are the functional unit of inheritance. They are the blueprints of the physical and mental make up of the man.

Each and every aspect of the individual and his tendencies has their origin in the Genetic Code and this is exactly what gives rise to Individualization.

The essence of Homoeopathy is also “Individualization”.
