Greetings to our wonderful readers!

Love is a wonderful emotion which can bestow sunshine on everyday. It brings with it the gift of a bright world filled with happiness and joy, hope and fulfilment. Basking in the sweet freshness of love, eagerness, a looking forward to the lovely moments of tomorrow.....

But in the fast-moving, competitive, power- hungry world of today does the innocent love of yesteryears have any place? In this world filled with greed, selfishness and cruelty what form and character has love donned? The current issue has an interesting chapter on love and its various rubrics in the **Repertory section**.

The **Organon section** speaks about Aphorism 19 of Hahnemann's 'Organon of medicine' and Dr. Prafull Vijayakar's explanation of it along with a case.

In the **Materia Medica** section the trimiasmatic picture of the remedy 'Ignatia' is discussed in detail. The entry into a case can be through multiple angles. Hence it is of immense importance to know every aspect of a remedy for quick prescribing. Every issue of Genetic Code of Homoeopathy deals with an in depth study of one remedy.

The section on **Organs and Systems** deals with the Upper G.I.T. In this chapter we will try to understand the changes that occur at the pathological level as well as the symptoms that one commonly encounters in GI diseases. This chapter will especially talk about the common symptoms of various diseases and will highlight the 3 miasms- Psora, Sycosis and Syphilis.

Thus the cover page depicts the Gastrointestinal system and the quiet obedient little Ignatia. Dr Akshay Shetty has contributed a beautiful sketch of Ignatia in the materia medica section.

In the **Clinical section** we have two syphilitic cases by Dr Prafull Vijayakar – Case of Necrotising Pneumonia and another case of Stomach Cancer. An acute case of Fever by Dr Kavita Sawant and a case on Gastric Reflux by Dr Avtar Singh.

We thank you, our readers, for your encouragement and support. We thank you for all your reviews and are very glad to reach out to so many fellow homoeopaths across India and across the globe . Our aim is to spread Dr Prafull Vijayakar's teachings on Scientific Homoeopathy as laid down by Hahnemann, and would appreciate your contribution for the same by sending in interesting articles and cases on [info@geneticcodeofhomoeopathy.com](mailto:info@geneticcodeofhomoeopathy.com)

The e journal is based on Dr Prafull Vijayakar's teachings of Predictive Homoeopathy. If there are any flaws in the e- journal they are not in Dr Prafull Vijayakar's teachings but they may be due to our short coming to understand him completely.

Aude Sapare,

Team Genetic Code of Homoeopathy
